Education

Montclair State University, Montclair, NJ, USA

Expected: May 2027

B.S., Computer Science

Relevant Coursework: Computer Networks, Data Structures and Algorithms, Software Engineering I & II, Fundamentals of Programming, Discrete Mathematics

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, Kotlin, Dart, Java, C, SQL, HTML/CSS

Frameworks and Tools: React.JS, React Native, Flutter, Expo, Firebase, AWS, MySQL, Firestore, NoSQL, VS Code, Flask, Jupyter Notebook, Nativewind CSS, Tailwind CSS, Git, GitHub, Linux, CPanel, GitHub Pages

Experience

Montclair State University

Information Technology Support Analyst

May 2026 - Present

- Delivered phone-based IT support to 100+ students, faculty, and staff, resolving account access, authentication, and connectivity issues with a 96% first-call resolution rate
- Diagnosed and resolved software and network issues across university systems
- Documented incidents in ServiceNow and escalated complex issues to specialized teams with thorough case notes for smooth handoffs

Montclair State University, School of Computing

Montclair, NJ

Undergraduate Research Scholar (Mentor: Dr. Stefan Robila)

Sep 2026 - Present

- Researching metadata standardization across hyperspectral datasets to improve discoverability
- Building a Python prototype to search hyperspectral datasets by GPS with image previews

Handshake AI

Remote

Annotator, Project Hedgehog

Jan 2026 - Present

- Evaluated AI model responses and annotated datasets used for machine learning model training
- Identified inconsistencies in model outputs to improve dataset quality and system reliability

Projects

Red Hawk Wallet (Android) — Team Lead (*Team of 6*)

- Led a 6-member Agile team building a secure campus digital wallet (Android, Kotlin, Jetpack Compose, Firebase)
- Built Tap-to-Pay, transaction history, and digital student ID with QR code generation

Red Hawk Wallet (Flutter) — Team Lead, Remote (*Team of 4*)

- Rebuilt the wallet cross-platform (Flutter, Dart, Firebase, Cloud Functions), leading a distributed 4-person team
- Established PR/branch workflow with mandatory reviews to maintain code quality remotely
- Integrated Stripe/Square sandbox payments and coordinated a 4-week MVP sprint

ScheduleAI — Full-Stack Development

- Built an AI-powered scheduling app (Next.js, Firebase, Vercel) with conflict-detection API and custom domain
- Resolved production issues independently (DNS, OAuth, env config); designed the landing page
